a shade more beautiful

### D7000

The DuraShade D7000 is an ideal solution for adding privacy and reducing solar heat gain. This is Durasol's most affordable vertical drop shading system, which is available with a complete line of options.

### E3000

The DuraShade E3000 is a self-storing system, which conceals the fabric when not in use. The fully-customized DuraShade E3000 can blend harmoniously into the exterior of your home and can be mounted on most surfaces.

### E3500

The DuraShade E3500 is the big brother to the DuraShade E3000. The custom, made-to-order DuraShade E3500 has the capacity to handle longer widths and greater drops, which makes it ideal for very tall glass areas.

### R8000

The DuraShade R8000 mounts inside the home and offers very affordable solar control with pull chain operation or it can be motorized for added convenience. The DuraShade R8000 is ideal for small to medium sized windows.

### R8500

The DuraShade R8500 also mounts inside your home and can handle long banks of windows, providing push button operating convenience. The commercial-grade DuraShade R8500 will keep your rooms cool and reduce solar glare.

### R8800

The DuraShade R8800 offers both versatility and control. This dual roller shading system features two different fabrics — an open weave fabric to provide solar control and a black-out fabric when total light blocking is desired. Either fabric can be activated with the simple touch of a button.

Durasol has numerous options available, allowing you to customize your solar screen system to accommodate your unique needs and provide you with the long-term comfort that is synonymous with the Durasol brand.

### Hardware to Match Your Décor

We offer the DuraShade Series in four architecturally pleasing colors: white, brown, sand and silver. For the discriminating homeowner, the hardware can be custom-painted to match your needs exactly.

White (Exterior and Interior)

Brown (Exterior and Interior)

Sand (Exterior)

Silver (Interior)

All Durasol Shading Systems can be built-in during time of construction. Complete specifications are available to architects and builders.

# Superior Protection, Elegant Function

**DuraShade® Series**  
Retractable Solar Screen Systems

Adding function, style and efficiency to home interiors with the latest in solar protection technology.

If you are looking for superior indoor comfort, an increase in privacy and protection from interior fading that blends perfectly with any décor and lifestyle, look no further than DuraShade® retractable solar screen systems.

DuraShade® systems are designed to blend with any home décor while providing maximum protection from solar glare and heat gain. Durasol offers a wide variety of designs and styles. Your local dealer will help you to choose a system that blends perfectly with your home and interior furnishings.

At Durasol, we aim to provide products that are suited to enhance every facet of your daily life. By the simple push of a button — or through complete automation — you can enjoy comfortable indoor living spaces and greatly reduce energy bills. Whether it's an indoor system to provide shade for better television viewing or an exterior system to allow added privacy in a bedroom or bathroom, you'll find we have the perfect system for your needs.

# DuraShade® Series Technology With Convenience

Increase home comfort and enhance daily living with a motorized or fully-automatic interior or exterior solar screen.

Our attractive, custom-made shading systems combine pleasing aesthetics with advanced technology to keep your home comfortable and beautiful. Not only will DuraShade® systems add to the comfort of your home, they can also help decrease interior fading from damaging UV rays. By choosing a DuraShade® system, you are sure to enjoy calm, comforting interior environments, reduced energy bills and complete control over your home's lighting and privacy.

## Control the Sun's Light & Diminish Fading

Durasol shading systems are designed to filter out the majority of the sun's negative effects while maintaining your outdoor view and allowing you full control over interior lighting. That means no more annoying glare on your television screen, and no more blinding light pouring in as you try to read. Plus, your solar screen greatly reduces damaging UV rays that can destroy your home's valuable furnishings. A DuraShade® solar screen will help to prolong the life of your drapes, carpets, wood floors, furniture and more!

## Electronically-Controlled Solar Protection

Durasol solar shading systems can be motorized or fully automated for even more simplified use. Customize your system to open and close with the touch of a button or install automatic sun and wind sensors for absolute coverage. An automatic shading system also adds an extra layer of security for when you are away. We offer a complete line of motors and electronic controls from touch of a button operation to fully automated sun and wind sensors that drop and retract according to the weather.

## Block Outdoor Light and Add an Extra Layer of Privacy

Durasol offers specifically-designed, interior-mounted shading systems that can completely block outdoor light or simply darken a room. Add privacy to a bedroom or bathroom, or darken a media room — we can design a system to meet your unique needs.

## Superior Design and Innovation

- ✓ Easy to operate
- ✓ Available with motorized controls for touch-of-a-button simplicity

- ✓ Fully-automated systems available with sun and wind sensors
- ✓ Stop unit at any desired position to take full control of solar lighting
- ✓ Built to last
- ✓ Stainless steel fasteners and cables

- ✓ Long lasting hardware finishes
- ✓ High-quality fabrics that are mildew and fade resistant
- ✓ Fully retractable into self-storage housing for protection from harsh weather.
- ✓ Backed by a 5-year warranty to ensure years of trouble-free service and lasting value.

## Specialized Fabric Selection

- ✓ Will not harden, crack or peel
- ✓ Block the effects of moisture and mildew
- ✓ Resist excessive fading
- ✓ Withstand the long-term effects of the sun

### WITHOUT Durasol exterior-mounted solar screen

### WITH Durasol exterior-mounted solar screen

### Reduce Heat Gain

DuraShade® systems effectively **reflect up to 88% of solar energy**, decreasing your home's temperature. Inside temperatures of homes protected by DuraShade® systems can be up to 10°F cooler than non-protected homes. During winter months, Durasol shading systems help to add an extra layer of defense by providing protection from fading and sun glare.

### Add Form and Function to Your Home

Durasol has a history of providing exceptionally crafted, custom-made and professionally installed retractable solar shades. Our dedication to maintaining this tradition has made us a leader in the industry and a sound investment for many homeowners. Your local Durasol representative will design and professionally install a retractable solar screen system that will add function and efficiency to your home.
